Google Cloud : GCP Fundamentals: Big Data & Machine Learning

Duration
1 Day

Cost
599 USD

Course Overview and Objectives

This one-day instructor-led course introduces participants to the big data capabilities of Google Cloud Platform. Through a combination of presentations, demos, and hands-on labs, participants get an overview of the Google Cloud platform and a detailed view of the data processing and machine learning capabilities. This course showcases the ease, flexibility, and power of big data solutions on Google Cloud Platform.

This course teaches participants the following skills:

- Identify the purpose and value of the key Big Data and Machine Learning products in the Google Cloud Platform.
- Use Cloud SQL and Cloud Dataproc to migrate existing MySQL and Hadoop/Pig/Spark/Hive workloads to Google Cloud Platform.
- Employ BigQuery and Cloud Datalab to carry out interactive data analysis.
- Train and use a neural network using TensorFlow.
- Employ ML APIs.
- Choose between different data processing products on the Google Cloud Platform.

Scope and Target Audience

Scope:

- Course level: Introductory
- Course duration: 1 Day
- Course format: Virtual Classroom Training
- Platform supported: Google Cloud Platform

Target Audience:

- Data analysts, Data scientists, Business analysts getting started with Google Cloud Platform.
- Individuals responsible for designing pipelines and architectures for data processing, creating and maintaining machine learning and statistical models, querying datasets, visualizing query results and creating reports.
- Executives and IT decision makers evaluating Google Cloud Platform for use by data scientists.

Prerequisites
To get the most of out this course, participants should have:

- Basic proficiency with common query language such as SQL.
- Experience with data modeling, extract, transform, load activities.
- Developing applications using a common programming language such Python.
- Familiarity with machine learning and/or statistics.

**Agenda**

This class is comprised of the following modules:

- Module 1: Introducing Google Cloud Platform
- Module 2: Compute and Storage Fundamentals
- Module 3: Data Analytics on the Cloud
- Module 4: Scaling Data Analysis
- Module 5: Machine Learning
- Module 6: Data Processing Architectures
- Module 7: Summary
